

Hydroseed Aftercare

Once our job is complete it is important that you take care of your new hydroseeded lawn to ensure quality results through its growing stage and as it matures.

Watering

- Water 2-4 times a day - 8AM 12PM 4PM - 10-15 minutes per zone
- Keep soil moist / damp
- The first 14 days are critical
- Do not water during the night - make sure its not wet after dusk to avoid fungus
- Increase water during hot / windy weather
- Make sure that all areas are hit evenly and accurately so no seed is deprived of water
- Check all areas to make sure that the water does not pool or run
- Be prepared to adjust your sprinkler according to the weather.
- If grass is coming in good and you start noticing areas turning brown / dying you may have a fungus
- Google “Pythium Blight” contact your lawn care / fertilizing company or Valley Green to apply a fungicide before it spreads

Fertilizing

In week 3-4 your new lawn should be fertilized with a starter fertilizer.. We recommend you hire a local reputable fertilizing company. If you are going to treat the lawn yourself, pick up a fertilizer with no weed killer in it. Try to avoid using weed killer on your lawn for **at least 3 months** or at least after mowing the lawn 3 times.

Just because your lawn now looks beautiful and is being mowed regularly does not mean that you can slack on necessary maintenance. Your lawn is still in its infancy stage and needs a lot of care to stay healthy! Your lawn needs to be watered, mowed frequently and fertilized throughout the year. If you have any questions please contact us and we would be happy to help.

Mowing

Once your new grass reaches 3.5 inches you can start mowing the lawn. Make sure your fresh grass is cut down no more than 3 inches. Make sure your mower blade is sharp.

Always keep the 1/3 rule in mind. Never cut off more than 1/3 of the grass blade during each mowing. Removing all clippings is recommended so you do not cause stress on your new lawn.

Feedback

Your feedback is important to our company. If you are happy with your results, we would greatly appreciate your time in giving us a 5-star review on Google and/or Facebook!! Please feel free to call with any concerns.
